About the MOOC

How can quality be measured in digital learning? Can the same criteria of traditional e-learning be used to measure the quality of new learning scenarios, such as mobile learning, gamified solutions or MOOCs? What are the added values of an international community working on the topic of quality in digital learning? These are only some of the questions that will be tackled during the MOOC.

The MOOC on Quality in Digital Learning will involve experts from the ECBCheck community of international organisations, such as UNU, UNITAR, FAO, ITC-ILO, World Bank Institute and GIZ, among others. However, the crucial part of the MOOC is the involvement of participants by providing the opportunity to share their own resources and bring in individual expertise and experience.

Mission

The mission and overall goal of this MOOC is to promote and stimulate a vibrant community for quality in digital learning that will remain functioning after the MOOC.

Course Format

The MOOC will run online free of charge. Unlike most traditional MOOCs, the focus will be less on individual knowledge acquisition, but on networking and generating new knowledge together, following the motto: Connecting, sharing and co-creating!

Target group

The MOOC will be held in English, and is open to a broad target group: educational specialists, administrators, managers, lecturers or trainers and everyone working in the field of learning with digital media who cares about quality assurance.

Certification

The participant will automatically receive badges and a certificate upon successful completion, provided he/she has actively and collaboratively participated in the MOOC.

Dates and Duration

The total course duration is **6 weeks (15 February – 25 March 2016)**, with a minimum of 3 hours a week for going through course materials and collaborative online work.

Newsletter

Upon registration, a regular newsletter will keep you up to date on all developments concerning the MOOC.

We are looking forward to learning with and from you during the MOOC! [Register Now!](#)

Best regards on behalf of the ECBCheck Initiative,
Your MOOC team
