Monitoring and publication notes on eSchool4S network project implementation progress

Conferences & Workshop to Present & Improve Products

Conference in Nyiregyhaza

The Nyíregyháza Conference aimed to show network results to a wider public and also to bring in Hungarian ESD Network experiences.

In this case, the evaluation focused on satisfaction with results and the opportunity to contribute expertise.

None of the Conference guests completed the feedback, but 13 consortium members responded.

Expectations were met for 11 of the respondents and there was a high level of satisfaction concerning opportunities to contribute. There was also general satisfaction with the potential for application of experiences gained at the Conference for pedagogic work.

Further points targeted were Atmosphere & Communicated rated on a scale of 10 (highest):

Atmosphere

Communication

At this stage in the process it was important to look at the way in which communication was working as a prerequisite for good co-operation leading to concrete results.

Workshop in Sofia

The workshop aimed to look at the results of the first trialling phase and to work towards enhancement for Phase 2.

Two of the core evaluation questions targeted satisfaction with outputs and clarity concerning the next two stages of work:

Satisfaction with outputs

The satisfaction level was 91.7 % followed by these comments:

- The outcomes are in line with the objectives of the workshop. A lot of useful information and inputs for further project implementation were provided.
- Yes, I think we brought up and discussed various issues which need attention.
- Our product is constantly increasing its quality.
- But still missing test teachers from Austria and Hungary
- Clear goals and deadlines is all I need.
- One more day for efficient workshops would have been fine.

5a: Are the next steps clear to you now?

It should also be mentioned here that the communication at this venue was rated much higher than in Nyiregyhaza:

7: From your perspective how effective was the communication
